EDDC	Emergency Department Data Collection
ESWLDC	Elective Services Wait List Data Collection
HMDC	Hospital Morbidity Data Collection
NADC	Non-Admitted Data Collection
MHDC	Mental Health Data Collection
MOS	Mode of separation
MPS	Multi-purpose service
PAS	Patient Administration System
SANADC	Subacute and Non-acute Data Collection
SORL	Source of referral - location
WA	Western Australia

1. Purpose

The purpose of this document is to provide an up-to-date list of WA Health establishments that report data to the Department of Health.

2. Background

The Patient Activity Data Establishment List is divided into two tables:

1. Establishment List, Reporting
2. Establishment List, Hospital Morbidity System Codes.

The Reporting list includes all establishments currently reporting activity to the Emergency Department Data Collection (EDDC), Hospital Morbidity Data Collection (HMDC), Non-Admitted Data Collection (NADC), Elective Services Wait List Data Collection (ESWLDC), Mental Health Data Collection (MHDC) and the Subacute and Non-acute Data Collection (SANADC).

The Hospital Morbidity System Code list includes all establishments and if applicable, the accompanying patient administration system (PAS) codes that denote the Establishment Type, Mode of Separation, Source of Referral and whether an establishment is considered a multi-purpose service (i.e. a site that can also deliver aged care services). These codes are primarily used in the webPAS system, but they are also integrated into private hospital PAS software to assist with patient classification.

Every establishment on the list has a unique number assigned and/or maintained by the Metadata team at the Department of Health.

3. Scope

The scope of this list is all establishments currently reporting activity to the EDDC, HMDC, NADC, ESWLDC, MHDC and the SANADC.

For clarity, this document does not include Community Mental Health Services, including those delivered by specialised mental health teams. These services are captured through the Mental Health Data Collection (MHDC) and are governed by separate data definitions, reporting rules, and classification requirements. Some community/ambulatory mental health activity may occur in non-admitted settings; however, it is reported under MHDC rather than NADC.

4. Establishments

Primary Health Establishment:

For the purposes of the WA Health Establishment List a primary health establishment is defined as a distinct, physical facility located in Western Australia that is registered, licensed and/or accredited, operates under its own identifiable clinical governance and operates for the primary purpose providing and/or facilitating professional health care to patients. Primary health establishments are those whose activity is required by legislation or policy to be reported at the state or national level.

Examples include:

Hospitals and WACHS health centres.

Secondary Health Establishment:

For the purposes of the WA Health Establishment List a secondary health establishment is defined as a facility which operates under its own identifiable clinical governance and operates for the primary purpose providing and/or facilitating professional health care to patients. Secondary health establishments are not necessarily required to have activity reported against them but for which assigning an individual establishment number is necessary for data management purposes (i.e. patient tracking) and/or patient administration systems and/or surveillance and/or financial reporting. Secondary health establishments are considered as such on a case-by-case basis.

Examples include:

Interstate hospitals, virtual hospitals, public health service facilities, Urgent Care Clinics, Transitional Care Programme, same-day clinics, dialysis clinics, remote area clinics/outreach, Aboriginal health service clinics, Royal Flying Doctors Service health clinics, residential aged care facilities, nursing homes, rehabilitation centres, and residential mental health facilities.

The WA Health Establishment List includes primary, secondary and other health establishments that are required for data collection purposes.

Establishment List, Reporting

Fields marked with a 'Y' indicate that the establishment reports patient activity data to the respective data collection.

Establishment List, Hospital Morbidity System Codes

The establishments listed are sorted in alphabetic order by establishment name. In addition to the establishment code and corresponding name, the list includes four additional columns as follows:

- **Est type** specifies the establishment type. See [Appendix A](#) for possible establishment types.
- **SORL** shows which Source of Referral - Location value must be used in conjunction with the establishment code. See [Appendix B](#) for possible SORL codes.
- **MOS** identifies the valid Mode of Separation value associated with the establishment code. See [Appendix C](#) for possible MOS codes. More details are available in the Hospital Morbidity Data Collection Data Dictionary.
- **MPS** indicates Multi-Purpose Services. MPS sites are those that function as hospitals and residential aged care. See [Appendix D](#) for a list of all MPS sites and their alternate names.
