

# Regional Incident Management Team Course **IMT**

## TOPICS COVERED

- Incident appreciation & action planning
- Incident command & control
- Response coordination
- Deployment of resources
- Recovery after a disaster
- WebEOC

## TARGET AUDIENCE

- Senior WA Health Staff that would be required to work within an Emergency Operations Centre (EOC).
- Other agency personnel that may be required to perform a liaison role

## LEARNING OUTCOMES

- Understand regulations and policy related to disaster and major incident requirements.
- Clarify the response change between a health facility incident and a multi-agency major incident.
- Learn the importance of prevention, planning, response & recovery stages of disaster management.
- Become aware of the tools and guides that can assist in the development of incident action & response plans.
- Ensure understanding of the Incident Command Structure (ICS), how it is used within an EOC and interactions between other agencies/EOC's.
- Improve knowledge of other emergency response services and their involvement in major incidents.
- Consolidate awareness around business continuity
- Comprehensive understanding of the recovery processes within Health facilities and the local community following a major incident.
