

Dear Doctor

The bearer of this letter has had sexual contact with someone diagnosed with the following sexually transmitted infection(s):

- ☐ Chlamydia
- ☐ Gonorrhoea
- ☐ Syphilis
- ☐ HIV
- ☐ Lymphogranuloma verereum
- ☐ Mpox
- ☐ Mycoplasma genitalium.

Guidelines recommend that contacts of confirmed cases should be examined and investigated for sexually transmitted infections and receive treatment if required for the infection(s) indicated above.

If the test results come back positive, please notify the infection to WA Department of Health and ensure that contact tracing is undertaken.

For further information see Silver book – STI/BBV management guidelines
