

Equipment in a syphilis testing bag

The bag should be easy to carry and not let water or dust in.

Other items not shown include:

- Condoms
- Point-of-care test kits (if used in your clinical services)
- Permanent markers
- Pathology request forms
- Method for collecting client details (hardcopy or electronic)
- Plastic trays (if you have them)
- Items to entertain young kids

Consider taking treatment. Be mindful of storage conditions of the medications.

This resource is based on the equipment used by the Ord Valley Aboriginal Health Service and Goldfields public health unit.
