- Pulmonary plus other sites

TREATMENT OUTCOME 2021

of all patients with TB disease in 2021 completed treatment

WESTERN AUSTRALIA TUBERCULOSIS CONTROL PROGRAM

The WA TB Control Program (WATBCP) located at the Anita Clayton Centre offers a specialised public health service that provides a state-wide outpatient service for the treatment, surveillance and prevention of tuberculosis. The WATBCP provides Specialist Medical advice to all cases of Active TB and Latent TB infection. There is a dedicated paediatric clinic to ensure the needs of children and their families are met. Individual case management for all clients is a nurse led approach that is an integral part of the success of the WATBCP
