had whole genome sequencing identifying 6 unidentified clusters

## WESTERN AUSTRALIA TUBERCULOSIS CONTROL PROGRAM

The WA TB Control Program (WATBCP) is a state wide specialised public health service that provides outpatient services for the treatment, surveillance and prevention of Tuberculosis (TB). The clinic, located at the Anita Clayton Centre provides treatment and management of active TB and Latent TB patients with a dedicated adult and paediatric clinic. Management of TB is via a nurse led case management approach for all patients.
