Assistant in Nursing Duties (Maternity)

February 2025

1.0 Introduction

This 'Related Document' is mandatory and for the interpretation and application of <u>MP</u> <u>0080/18 Assistant in Nursing Policy</u> (the policy), specifically in the maternity setting.

Assistants in Nursing (AIN) are a category of unregulated healthcare workforce. The role of the AIN is to assist in the delivery of patient care in the acute care or aged care environment. AIN must work under the direction of a nurse or midwife. They are a complementary workforce and not a substitute for the number of nurses or midwives employed under current industrial workplace arrangements.

There are two AIN pre-requisite pathways to facilitate employment – AIN (Student) and AIN (non-student), as outlined in the policy. Of note, as written in policy, where an AIN (Student) has successfully completed the Nurses and Midwives Board of Australia (NMBA) approved program listed above, they may continue working as an AIN (non-student) until cessation of employment (including expiry of a fixed term contract) or until appointment or promotion to another position.

2.0 AIN in General Hospital/Health Care Facility Setting

All duties and tasks are to be delegated and performed under the direction and supervision of a midwife or nurse, with adherence to local policy and guidelines.

AINs will be provided with a copy of this *Assistant in Nursing Duties (Maternity setting)* document on commencement of their employment.

AINs must not perform duties not listed within the Assistant in Nursing Duties (Maternity setting) document.

3.0 Assistant in Nursing Duties (Maternity)

The following duties are applicable to all AINs employed by WA Health in the maternity setting.

Duties specific to the "Mother" and/or "Baby" are identified in this document and each duty is delegated under the direction and supervision of a midwife or nurse.

An AIN (non-student) with a Certificate III in Individual Support - Ageing or Certificate III Aged Care (superseded by Certificate III in Individual Support-Aged Care in 2015) is restricted to working in WA Country Health Service aged care or Multi-Purpose Services only and should not work in the maternity setting.

Duties	Description of Duties	
Meals Assistance	 Safe positioning of patients to receive meals 	 Mother
	 Preparation of table over bed or chair 	only
	 Assist with cutting up food and opening packages on meal tray 	
	 Physically feeding patients who are unable to do so themselves under the direction of the midwife or nurse
