1. Purpose

The purpose of the *Mental Health Data Collection Data Specifications* is to outline the requirements for Health Service Providers and Contracted Health Entities to report mental health patient activity to the Department of Health, as the System Manager.

Mental Health Data Collection Data Specifications is a related document mandated under [MP 0164/21 Patient Activity Data Policy](#).

These data specifications are to be read in conjunction with this policy and other related documents and supporting information as follows:

- [Admitted Patient Activity Data Business Rules](#)
- [Community Mental Health Patient Activity Data Business Rules](#)
- [Mental Health Data Collection Data Dictionary](#)
- [Patient Activity Data Policy Information Compendium](#).

2. Background

Community or ambulatory mental health consumer activity refers to care provided by **public** specialised mental health services to mental health consumers who **are not** currently admitted to a mental health inpatient or residential service.

Data relating to this type of mental health consumer activity are based on service contacts and these are collected by the Department of Health in the Mental Health Data Collection (MHDC).

Please Note: *The Mental Health Data Collection (MHDC) is transitioning toward full adoption of the term ‘Consumer’ as the standard descriptor for individuals who engage with or receive care from Mental Health Services.*

This terminology replaces the use of ‘Client’ or ‘Patient’ across all data-related assets, including data elements, metadata definitions, reporting outputs, system labels, and associated documentation.

This terminology change ensures consistency within the MHDC dataset and supports a person-centred, recovery-oriented approach to data governance and reporting.

Standardising terminology to ‘Consumer’ strengthens data quality, promotes alignment with contemporary mental health practice, and ensures coherence across local, state, and national reporting requirements.

3. Contact details requirements

Data providers must complete the contact details form ([Appendix A](#)) and provide contact details for two people who can be contacted in the event of data submission queries or issues:

- ICT technical contact – for data load/extract issues
- Information management contact – for data queries

4. Submission of data

Data must be submitted to the MHDC in accordance with the data submission schedule ([Section 5](#)) and data element listing ([Section 6](#)) outlined below, unless otherwise agreed to with the MHDC Custodian.

5. Data submission schedule

Data must be made available for the relevant reporting period as per the schedule set below:

PAS	Reporting Period	Provided to MHDC	Notes
PSOLIS	Daily data, to midnight	Next day, 1am	

6. Data element listing

Data providers must ensure that data is made available as per the specifications in the following appendices:

- [Appendix B – Mental health consumer demographics](#)
- [Appendix C – Inpatient services](#)
- [Appendix D – Referrals](#)
- [Appendix E – Alerts](#)
- [Appendix F – Incidents](#)
- [Appendix G – Community mental health and service contacts](#)
- [Appendix H – NOCC and AMHCC clinical measures](#)
- [Appendix I – Legal orders](#)
- [Appendix J – Triage Presenting Complaint and Referral Presenting Problem Codes](#)

7. Data quality and validation correction process

Data providers are responsible for the quality of data provided. The Quality and Assurance Team at the Department of Health undertake data quality validations to ensure that data is compliant with reporting specifications, and the five data quality principles:

- relevance
- accuracy
- timeliness
- coherence
- interpretability.

Data validation and errors will be distributed to the reporting Health Service Provider via dashboards, spreadsheets or ad hoc communication.

Where the data correction and/or completion can be made via the PSOLIS front end, it is the responsibility of health care providers, administrative, clinical coding and clerical staff to complete and correct data validations within required times, as communicated by the Department.

Where corrections cannot be resolved via the PSOLIS front end, Health Support Services in consultation with Health Service Providers are responsible for correcting data.

Examples of data quality validations may include, but are not limited to the following:

- Patient demographics
- Reporting of blank or incorrect values
- Availability of sufficient information to enable reporting to the Independent Health and Aged Care Pricing Authority.

For the full list of current MHDC data quality validations, refer to the [Mental Health Information Data Collection Data Validation Manual](#).

8. Definitions

The following definition(s) are relevant to this document.

Term	Definition
Contracted Health Entity	A non-government entity that provides health services to the State under a contract or other agreement entered into with – (a) a Health Service Provider; or (b) the Department CEO, the Minister or the Premier on behalf of the State.
Custodian	A custodian manages the day-to-day operations of the information asset(s) and implements policy on behalf of the Steward and Sponsor.
Data Collection	Refer to Information Asset.
Data Specifications	Data Specifications mandate the list of data elements, format and submission schedule for each information asset.
Health Service Provider	A Health Service Provider established by an order made under section 32(1)(b) of the Health Services Act 2016 and may include North Metropolitan Health Service (NMHS), South Metropolitan Health Service (SMHS), Child and Adolescent Health Service (CAHS), WA Country Health Service (WACHS), East Metropolitan Health Service (EMHS), PathWest, Quadriplegic Centre and Health Support Services (HSS).
Information asset	A collection of information that is recognised as having value for the purpose of enabling the WA health system to perform its clinical and business functions, which include supporting processes, information flows, reporting and analytics.
Information Management Policy Framework	The Information Management Policy Framework specifies the information management requirements that all Health Service Providers must comply with in order to ensure effective and consistent management of health, personal and business information across the WA health system.
Patient Activity Data Business Rules	Patient Activity Data Business Rules mandate the rules, scope and criteria to be used when recording health service patient activity data and reporting to the Department of Health as the System Manager.
System Manager	The term used to describe the Department CEO's role in managing the WA health system to the extent necessary to provide stewardship, strategic leadership and direction and to allocate resources for the provision of public health services in the State under section 19 of the Health Services Act 2016.
WA health system	The WA health system is comprised of: (i) the Department; (ii) Health Service Providers; and (iii) Contracted health entities, to the extent they provide health services to the State.
