

Western Australian Coding Rule

0312/02 Follicular lymphoma transformed to diffuse large B-cell lymphoma

Q.

What is the correct morphology code for follicular lymphoma transformed to diffuse large B-Cell lymphoma?

A.

Advice was sought from the Principal Medical Officer at the WA Cancer Registry. Interestingly, it has been identified that the better fit for this case is the diffuse large B-cell lymphoma morphology, even though the morphology for follicular lymphoma is higher. The rationale for this is that there are more identifying descriptors in the M9680/3.

DECISION

Follicular lymphoma transformed to diffuse large B-cell lymphoma should be assigned morphology code M9680/3 *Diffuse large B-cell lymphoma NOS*.

This advice has a minor modification to correspond with an update in ICD-10-AM/ACHI/ACS Twelfth Edition, effective 1 July 2022.
