

Western Australian Coding Rule

0911/06 Penile frenulotomy

Q.

Patient admitted for a penile frenulotomy, documented as Bowspirit procedure on the doctor's admission papers. What is the correct procedure code assignment?

A.

There is no specific code for frenulotomy of penis or Bowspirit procedure, and it is not clear from your documentation whether frenuloplasty was performed. We suggest assignment of 90402-00 [1194] *Incision of penis*.

DECISION

Assign 90402-00 [1194] *Incision of penis* for frenulotomy.
