

## Kimberley heatwave impact map

Label	Local Government Area	Heatwave impact
1	Halls Creek (S)	highest
2	Derby-West Kimberley (S)	high
3	Broome (S)	median
4	Wyndham-East Kimberley (S)	least

### Notes

- Due to relatively small populations, caution should be exercised when interpreting data from rural areas. The data for metro areas is relatively more reliable than that for rural areas.
- Even in local government areas with overall better socioeconomic status, there is still a proportion of residents severely affected by heatwave. Thus the health education programs should target all areas.

\* Details of the methods used for categorising heatwave impact in different geographical areas can be obtained by contacting [dpmu@health.wa.gov.au](mailto:dpmu@health.wa.gov.au)
