

Let's help each other

There are people in our community, like older Australians, who are going to need a bit of extra help during this COVID-19 pandemic.

So, please offer your help to neighbours and friends wherever you can. Make a phone call, pick up some groceries or medicine for them.

Luckily there are some great ways we can stay in touch with friends and family – especially loved ones in aged care and remote communities

Together, we will get through this WA.
