All clinical incident investigation services must be performed in accordance with the Clinical Incident Management Policy issued by the Department CEO under the Clinical Governance, Safety and Quality Policy Framework.

The terms of an agreement made pursuant to section 48(1)(b) of the Act do not limit the SMHS obligations under this Agreement, including the performance standards provided for in this Agreement.

This will follow a joint consultation process with the SMHS to understand the cause of the under-delivery and any remedial action plan.

Additional information on the funding and purchased activity detailed in this Agreement can be found in the *WA Health Funding and Purchasing Guidelines*.

10. SERVICE STANDARDS - THE PERFORMANCE POLICY FRAMEWORK

The performance reporting, monitoring, evaluation and management of the SMHS in relation to the terms of this Agreement is as prescribed in the Performance Policy Framework and PMP.

The PMP is based on a responsive regulation intervention model. The model is a collaborative approach that enables accountability through agreed mechanisms that are responsive when performance issues have been identified. The performance management components of the PMP comprise:

- on-going review of Health Service Provider performance
- identifying a performance concern and determining the appropriate response and agreed timeframe to address the concern
- deciding when a performance recovery plan is required and the timeframe it is required
- determining the level of intervention when required and when the performance intervention needs to be escalated or de-escalated.

Regular performance review meetings will be held between the Department CEO and the SMHS, or representatives of either Party. The performance reports that enable the Department CEO to monitor and evaluate the SMHS performance are listed in the PMP. The performance reports are an important part of the performance review meetings. The frequency of the meetings is determined by the Department CEO, and may be increased if performance issues occur.

10.3 Performance Data

In accordance with section 34(2)(n) of the Act the SMHS is required to provide performance data for the monthly production of the performance reports as required by the Department CEO.

10.4 Link to Annual Reporting

Annual Reporting is required under the *Financial Management Act 2006*. The Key Performance Indicators (KPIs) within the Annual Report for Health Service Providers are approved by the Under Treasurer and are auditable by the Auditor General.

Efficiency KPI targets are established on a system-wide level, and published in the Government Budget Statements. The Department will determine the SMHS specific targets through a rigorous modelling process that aligns with the 2019-20 Service Agreement and other relevant data as appropriate.

Effectiveness KPI targets are set at a Health Service Provider level by the Department. The Department will notify the SMHS on the Efficiency and Effectiveness KPI targets for Annual Reporting.

The 2018-19 Mid-year Review Deed of Amendment previously showed System Manager Initiatives; these have been reclassified to GCM and HAA to enable comparison.
- For the 2019-20 Service Agreement, the figures in all schedules would normally include an allocation (apportioned across OBM service categories) for Financial Products, HSS- Resources Received Free of Charge (RRFOC) and PathWest-RRFOC and are shown separately in all schedules.
