Publication of Submissions

Please note all Public Submissions will be published unless otherwise selected below

I consent to my submission being published

Submission Guidance

You are encouraged to address the following question:

In the context of the Sustainable Health Review Terms of Reference listed below, what is needed to develop a more sustainable, patient centred health system in WA?

- Leveraging existing investment in Primary, Secondary and Tertiary healthcare, as well as new initiatives to improve patient centred service delivery, pathways and transition;
- The mix of services provided across the system, including gaps in service provision, sub-acute, step-down, community and other out-of-hospital services across WA to deliver care in the most appropriate setting and to maximise health outcomes and value to the public;
- Ways to encourage and drive digital innovation, the use of new technology, research and data to support patient centred care and improved performance;
- Opportunities to drive partnerships across sectors and all levels of government to reduce duplication and to deliver integrated and coordinated care;
- Ways to drive improvements in safety and quality for patients, value and financial sustainability, including cost drivers, allocative and technical efficiencies;
- The key enablers of new efficiencies and change, including, research, productivity, teaching and training, culture, leadership development, procurement and improved performance monitoring;
- Any further opportunities concerning patient centred service delivery and the sustainability of the WA health system.

Submissions Response Field

Please type your response into the field below. Alternatively you may provide your submissions as a separate attachment (Suggested Maximum 5 pages).

Allow far more patient driven initiative. Where people have the ability to steer the required input, as in accessing the necessary tests without a doctor's input ,or a simple nurse consult to double check a particular symptom. Cut the red tape surrounding this access.

Where family or carers's are involved with someones care, LISTEN & ACT on their input and INVOLVE THEM.

STOP keeping families at arms length when interacting with a person with mental distress. They are the 24/7 workers, without whose input many more would be homeless and not be receiving treatment or any care.
