

Transition Care Program Locations

Transition Care Program locations

The Transition Care Program (TCP) offers short-term care (up to 12 weeks) for you to regain health and mobility after a hospital stay. If you are well enough to leave hospital but still need help with daily living, the following organisations provide TCP services. This depends on where you live, the service you need and your preferred location. If you are unsure on the services suitable for you, speak to your social worker.
